Example: DOB: 22-11-2012

How to calculate your Decision-making chakra (Personality)?

The (day) date represents your personality, so we can say that this is your most dominant chakra by default. Whenever something happens, most of your decisions will be based on the qualities of this chakra.

From Aurascope methods, you can understand if the decisions are positive or negative depending on the movement or status of the chakra.

Example: here 22 becomes $2+2=4$, ruled by Earth star chakra and planet Rahu.

DOMINANT CHAKRA NUMBER= 4

Heart chakra (emotions) + Heart chakra (emotions) = Wants you to be Earth star chakra (discipline and tap into mother Earth energy and realize you already have what

you want to have, its just hidden in your energy just like your Earth star chakra, which is not physical but creates everything because it is the energy of metaphysical powers of earth)

By default, you will be concerned with the aspects/qualities of these two things (chakra and planet)

Most of your decisions will be connected to:

- 1) Financial aspects (security too much money or insecurity, no cash flow for months)
- 2) Bloodline (challenges or support system)
- 3) Ability to discipline and trust others (blind trust or no trust at all)

Basically, you will be swinging between the extremes because that's what the Earth star chakra (Rahu) does when it's not in balance. Your idea is to balance them consciously by working on your spiritual discipline.

How to calculate your soul's desire and which chakra is connected to that?

(Your soul wants you to operate from the positive and balanced qualities of that chakra)

$2+2+1+1+2+0+1+2= 11$ becomes $1+1= 2$

DOMINANT SOUL CHAKRA NUMBER= 2

You will encounter maximum challenges in this area of life (chakra)

Some numerology schools go with the thought of master numbers and do not deduce that but we are not learning numerology here but rather the effect of various numbers and planets on chakras hence we will reduce to a single number. Here 11 becomes 2.

Now your total is 2, some experts call it as the Destiny number, which is what your soul wants you to be like.

Your soul wants you to have the positive aspects and live a balanced life from your heart chakra. Look into the chart, to see what are the positive aspects of the heart chakra or the planet moon.

Emotional stability and a sense of love and compassion
Positive and fulfilling personal relationships
Ability to give and receive love
Openness and forgiveness
Good physical circulation and immune system.

What is the energy of the current year for which you want to make the forecast

Reduce the entire compound number to a single digit number

Example: 2025 becomes $2+0+2+5=9$

9 ruled by Planet Mars or Root Chakra

It means this year you need to act on making your root chakra balance consciously.

Especially if you notice you falling behind or getting stuck in the negative qualities of the chakra (underactive, blocked aspects of chakra) or becoming extremely focused only on the positive aspects of the chakra and that is becoming a concern for you (Overactive chakra).

How to check your Personal Year

Step 1: Add the Date (22) + Month together (11)

$2+2+1+1=6$

Step 2: Add the Total of Year you wish to calculate for:

Example You want to check your personal year for 2025 so total is $2+0+2+5=9$

6 (from step 1) + 9 (total of 2025)= 15

Again deduce it to single digit= $1+5=6$

Personal Year= 6, ruled by Venus, Affected by Sacral Chakra.

Imagine you've been stuck in the same job for years but always dreamt of starting your own business. This year nudges you to take that leap of faith. You'll notice doors opening—an investor might show interest, or you may stumble upon the resources you need. However, fear might creep in, making you doubt your capabilities.

Advice for Balance:

Focus on building a strong foundation for the future. This is a year to prioritize action but also to ensure you don't burn out. Balance is key. Ruled by the Moon, it's a deeply emotional year, where the Heart Chakra becomes your guide. The Moon heightens intuition and emotional sensitivity, helping you form meaningful connections. However, this heightened awareness can sometimes make you feel vulnerable or overwhelmed.

This is a year of duality. While you'll find immense joy in working with others and building bonds, challenges may arise in the form of miscommunication or emotional conflicts. It's also a year of patience—progress may seem slower than expected, but it's because you're being asked to focus on the foundations of trust and understanding.

How It Affects Us:

- Positive: You'll develop stronger relationships, deepen emotional bonds, and improve teamwork. Emotional intelligence is heightened, making it easier to empathize and collaborate.
- Negative: Over-sensitivity may lead to emotional burnout or conflict. You might feel overly dependent on others for validation or struggle with setting boundaries.

This year emphasizes responsibility and practicality, pushing you to evaluate and strengthen the core aspects of your life, including finances, health, and relationships. The energy is not flashy or quick-moving—it's about steady progress. You might face challenges that test your patience and commitment, but these are necessary for long-term growth.

How It Affects Us:

- Positive: You'll develop a strong sense of discipline and satisfaction from accomplishing meaningful tasks. Projects that have felt stagnant may finally start to move forward as you invest consistent effort.

You might feel like progress is slow, but every step you take now strengthens your future. For example, if you've been dreaming of owning a home, this year might be about saving, budgeting, and planning—not glamorous, but essential.

Advice for Balance:

This year is about finding harmony between effort and self-care. While it's important to work hard, don't forget to take breaks and celebrate small wins. Be patient—success is a marathon, not a sprint.
