How to calculate your Decision-making chakra (Personality)?

The (day) date represents your personality, so we can say that this is your most dominant chakra by default. Whenever something happens, most of your decisions will be based on the qualities of this chakra.

From Aurascope methods, you can understand if the decisions are positive or negative depending on the movement or status of the chakra.

Example: here 22 becomes $2+2=4$, ruled by Earth star chakra and planet Rahu.

DOMINANT CHAKRA NUMBER= 4

Heart chakra (emotions) + Heart chakra (emotions) = Wants you to be Earth star chakra (discipline and tap into mother Earth energy and realize you already have what you want to have, its just hidden in your energy just like your Earth star chakra, which is not physical but creates everything because it is the energy of metaphysical powers of earth)

By default, you will be concerned with the aspects/qualities of these two things (chakra and planet)

Most of your decisions will be connected to:

- 1) Financial aspects (security too much money or insecurity, no cash flow for months)
- 2) Bloodline (challenges or support system)
- 3) Ability to discipline and trust others (blind trust or no trust at all)

Basically, you will be swinging between the extremes because that's what the Earth star chakra (Rahu) does when it's not in balance. Your idea is to balance them consciously by working on your spiritual discipline.

How to calculate your soul's desire and which chakra is connected to that?

(Your soul wants you to operate from the positive and balanced qualities of that chakra)

$2+2+1+1+2+0+1+2= 11$ becomes $1+1= 2$

DOMINANT SOUL CHAKRA NUMBER= 2

You will encounter maximum challenges in this area of life (chakra)

Some numerology schools go with the thought of master numbers and do not deduce that but we are not learning numerology here but rather the effect of various numbers and planets on chakras hence we will reduce to a single number. Here 11 becomes 2.

Now your total is 2, some experts call it as the Destiny number, which is what your soul wants you to be like.

Your soul wants you to have the positive aspects and live a balanced life from your heart chakra. Look into the chart, to see what are the positive aspects of the heart chakra or the planet moon.

Emotional stability and a sense of love and compassion
Positive and fulfilling personal relationships
Ability to give and receive love
Openness and forgiveness
Good physical circulation and immune system.

What is the energy of the current year for which you want to make the forecast

Reduce the entire compound number to a single digit number

Example: 2025 becomes $2+0+2+5=9$

9 ruled by Planet Mars or Root Chakra

It means this year you need to act on making your root chakra balance consciously.

Especially if you notice you falling behind or getting stuck in the negative qualities of the chakra (underactive, blocked aspects of chakra) or becoming extremely focused only on the positive aspects of the chakra and that is becoming a concern for you (Overactive chakra).

How to check your Personal Year

Step 1: Add the Date (22) + Month together (11)

$2+2+1+1=6$

Step 2: Add the Total of Year you wish to calculate for:

Example You want to check your personal year for 2025 so total is $2+0+2+5=9$

6 (from step 1) + 9 (total of 2025)= 15

Again deduce it to single digit= $1+5=6$
